

ABSTRACT OF THE DISCLOSURE

The present invention provides an improved sport catching glove. The improved catching glove is formed with an inner compartment shaped to dispose a hand of a player therein and arranged to permit free movement of the hand. The sport catching glove comprises a hand wrapper that encircles the hand of a catcher and allowing free movements of all fingers and of wrist. The wrapper is fixed inside the inner compartment and prevents the catching glove from escaping from the grip of the hand while allowing a free movement along axis of the wrist and of all fingers.
